

Our goal is environmental sustainability in providing our services to customers through our local and national project delivery.

WE HAVE A COMMITMENT TO

- ensure our operations minimise the short and long-term impact of our activities on the environment and local communities through responsible environmentally sustainable management.
- conserve resources, reduce energy consumption, and minimise waste in our office and throughout our site operations.
- promote a positive culture through applying initiatives that foster sustainable innovation.
- optimise our products and services to improve our environmental sustainability performance and improve the sustainable use of natural resources.
- comply with relevant environmental legislation, appropriate industry guidelines and standards, customers, and regulatory agency requirements.
- implement accountable work practices that minimise the impact on local communities through sustainable management planning.
- implement and maintain an environmental management approach consistent with international standards.
- evaluate the performance, effectiveness, and compliance of our operational activities through regular audits and reviews.
- implement effective controls to identify, evaluate, eliminate, or reduce adverse environmental risks from our work activities.
- take all practical steps to prevent environmental damage to our waterways and ecosystem.
- procure goods and services locally to minimise environmental risk, reduce our carbon footprint and stimulate benefits for our local communities.
- adopt a transparent approach by reporting our environmental sustainability performance to our community and customers.
- provide education and training to our workforce to increase general environmental awareness and understand our business partners goals.
